Denver

Edmonds

In accordance with the Portland Building Code, permit documents, and the City of Portland's Special Inspection Administrative Rules, special inspections have been provided for the subject project. We are writing this letter to summarize that work. Representatives of Hart Crowser have observed and tested shoring installation, excavation, placement of a geotextile demarcation layer, backfill, compaction, and removal of the shoring system.

Eureka

Based on the work described above as well as on our review of the available documentation, all of the work appears to have been constructed in accordance with the approved plans and specifications, our recommendations, and the requirements of the City of Portland.

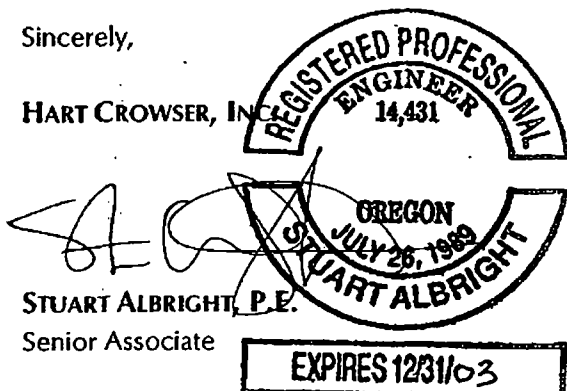

Jersey City

If you have any questions about our findings, please feel free to contact the undersigned.

Juneau

Sincerely,

HART CROWSER, INC.
